Profile

Junior MERN Stack Developer with hands-on experience building responsive React applications and full-stack features using Node.js, Express.js, and MongoDB. Experienced in authentication flows, REST API integration, role-based access, form validation, and team-based Git/GitHub workflows. Contributed to Sanda, a capstone workforce marketplace platform covering jobs, applications, payments, QR attendance, chat, notifications, and admin workflows.

Education

B.Sc., Computer Science – Information Systems, Suez Canal University 2025
Ismailia, Egypt

Internships & Professional Training

MERN Stack Trainee, Digilians 01/2026 – 06/2026

- Engineered full-stack web applications using MongoDB, Express.js, React, and Node.js.
- Applied UI/UX fundamentals and responsive design principles.
- Coordinated leadership and team-collaboration practices.
- Acquired freelancing fundamentals and client-communication skills.
- Developed soft skills: problem solving and time management.

Digital Egypt Pioneers Scholarship – MCIT 04/2024 – 10/2024

- Sponsored by MCIT; covered technical front-end skills, English language, soft skills, and freelancing.
- Included a capstone project and mentorship programme.

Advanced Front-End Development (React.js) – Internship 07/2024
Summer Training. ITI, Ismailia Branch

Front-End Internship 08/2023
Summer Training. ITI, Ismailia Branch

Projects

Sanda — Smart Workforce Marketplace | DiGiLiANS Capstone Project,

React, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, React Query

- Built and integrated features for a workforce marketplace connecting employers with verified workers for short-term jobs.
- Implemented and integrated job lifecycle flows: job posting, applications, applicant acceptance/rejection, assignments, and job status tracking.
- Worked on authentication and role-based access flows for Worker, Employer, and Admin users.
- Integrated payment-related frontend flows including payment status feedback, refund handling, and wallet-related UI states.
- Improved form handling across the platform using reusable components, validation, loading states, and safe API error handling.

- Contributed to QR attendance workflows for check-in/check-out and updated related tests.
- Collaborated with a team using Git, GitHub branches, pull requests, conflict resolution, build, lint, and test validation.

Graduation Project – Chatify

A modern AI-powered chat application supporting instant messaging, group chats, voice/video calls, and media sharing.

- Built the front-end using React.js, focusing on responsiveness and clean UI design.
- Collaborated with a team of 8 using GitHub for version control and task management.
- Integrated real-time chat, AI chatbot, voice-to-text, and multilingual translation support.

House Of Dessert | Full-Stack E-Commerce Application

- Developed a responsive Arabic RTL e-commerce application for a premium dessert brand using React, JavaScript, Vite, and Tailwind CSS.
- Built reusable UI components, product catalog, category filtering, product details, shopping cart, checkout flow, and order management system.
- Implemented state management, cart persistence, authentication, payment workflow, and admin dashboard features.
- Designed a scalable frontend architecture with responsive layouts and modern UI/UX practices.

Tech Stack: React, JavaScript, Vite, Tailwind CSS, React Router, Zustand, Node.js, Express.js, MongoDB

Technical Skills

Frontend HTML5, CSS3, JavaScript, TypeScript, React.js, Vite, Tailwind CSS, shadcn/ui, React Query, React Hook Form, Zod, Responsive Design	Backend Node.js, Express.js, REST APIs, JWT Authentication, bcrypt
Database MongoDB, Mongoose	Concepts Role-Based Access Control, API Integration, Form Validation, Error Handling, UI/UX Fundamentals
Tools Git, GitHub, Postman, VS Code, Vercel, Vitest	Soft Skills Teamwork, Problem Solving, Time Management, Client Communication

Languages

Arabic Native	English Fluent
